

# Endian Security Administrator Training

## The introductory course to Endian solutions

Providing a comprehensive overview of the management interface and all the features, ESAT course enables a 360-degree approach to Endian technology and perform installations of the various products in a very effective and independent way.

**By achieving ESAT technical training, the reseller acquires the status of Endian Certified Partner.**

## Lesson Delivery and Participation

The course is online and structured for a duration of one working day in a self paced mode: student can attend the training according to his schedule needs. Successful completion of the test will result in the ESAT certification, required to enter the Certified level of the partner program.

## Cost of Participation

**Attendance is free of charge**, and certification can be obtained through the purchase of the exam session for 200€, available upon request.
